## SOOTHES AND PROTECTS

**V**et-Concept doesn't settle for compromises. Especially when it comes to care products. That's why we carry the exclusive St. Diem's product line. These handmade tinctures and salves are the perfect addition to our range. What Vet-Concept pet food does on the inside is supported by these care products on the outside. **Healthy skin and hair!**

Our four-legged friends' hair has to withstand a lot throughout their lives, from fleas and other pests to infections and allergic reactions. Their eyes, ears, teeth and paw pads also go through a lot and need special care. Natural substances – such as plant oils, herbal extracts, Dead Sea salt and minerals – have really proven their worth in caring for your pets. These don't just provide great protection; they are also extremely gentle and free from harmful substances. That's why our top priority is the quality and purity of our ingredients. All of our products are developed by pharmacists and doctors in our Munich factory under the same strict conditions as human cosmetics. The aim is to combine traditional healing with the science of modern medicine.

We are proud to exclusively present these exceptional care products to you.

Over the following pages, you'll find a level of quality that your four-legged friend will love.

# Safe & comfortable

## SPICK AND SPAN

**T**oilet use by cats is often underestimated and should be given more attention. Cats in particular really value a certain level of comfort and security when they need to spend a penny. It's not uncommon for a sensitive moggie's behaviour to change drastically through a few changes to their loo. And even though it's not quite as pleasant to talk about, it's just as important as nutrition and digestion. So it's easy to understand why Vet-Concept provides the best cat litter.

We know that each and every one of our four-legged friends has their own preferences, so we offer different types of litter under the Cat's Best brand. These are completely made up of natural plant fibres and are odour-neutralising as well as absorbent. But it's not just you we want to impress. A litter's smell and feel are important factors for almost all cats' well-being. Their toilet breaks should be defined by a pleasant terrain and smell. It goes without saying that no chemical additives or fragrances are used in these products, just as in our food.

We are proud to present these exceptional products to you. Over the following pages, you'll find the quality that your four-legged friend values.
